COURSE DESCRIPTION

We are extremely fortunate to have a "bunch of experts" in endoscopic sinus surgery as our guests at this course, and we would like to invite you to join us on this journey, through the nose into the paranasal sinuses. The course aims at improving the skills for endoscopic sinus surgery.

COURSE OBJECTIVES

The course objectives are:

- To review the endoscopic anatomy of the nose and sinuses.
- To provide the opportunity to improve the skills handling endoscopes and instruments in the nose and to learn, step-by-step, the endoscopic surgery of the nasal cavity and sinuses, including access to the frontal, exposure of the ethmoidal and sphenopalatine arteries, endoscopic DCR, orbital and optic nerve decompression, canthotomy and cantholysis etc.
- To learn decision-making in the management of sinonasal lesions.
- A stepwise surgical approach to the nose and sinuses on FRESH cadaver.

12:30 Sphenoidotomy and exposure to sella

13:30 Lunch

14:30 Frontal sinus approach (DRAF I-III)

15:30 Endoscopic Dacriocystorhinostomy

16:30 Nasoseptal flap, inferior turbinate and lateral wall flaps

17:30 Coffee break

18:00 Orbital and optic nerve decompression. Canthotomy and Cantholysis,

19:00 Adjourn
